Attachments: ATT00001.txt

To all,

Below is the CSO activation notice we received for LWSC CSOs discharging Friday, Nov 16th. As of this email we have not received notice that the CSOs have ceased discharging. LWSC has failed to provide the notification information required for each CSO discharge (**start and stop times, quantity/volume of overflow and time verified/transmitted**).

Joseph E. Nerden // Environmental Engineer IV // Municipal Services/Water Pollution Control/Wastewater Management // **MassDEPNortheast Regional Office** // 205B Lowell Street // Wilmington, MA 01887 // **Phone: (978) 694-3239** // Fax: (978) 694-3499 // email: Joseph.Nerden@Mass.gov

Subject: Lynn CSO event 11-16-18

Please be advised that permitted Combined Sewer Overflows (CSO): CSO_003, CSO_004, and CSO_005 are currently discharging due to heavy rainfall.

Portions of Lynn are served by combined stormwater and sanitary sewer systems, common in older cities. These systems are relieved by CSO's during rain events to prevent sewer backups into homes, businesses and streets. There are four CSO discharge points in Lynn illustrated in the figure below. Discharges from these CSO's include oxygen-demanding pollutants, bacteria and other pathogens, solids, and debris. It is recommended that you avoid contact with receiving waters during wet weather.

This notification is being issued to you in accordance with the conditions of the Lynn Water and Sewer Commission's Updated Overflow Response Plan. The plan was developed to comply with the requirements of the Massachusetts Department of Environmental Protection.

For more information contact the LWSC Engineering Department at 781-596-2400 or visit us on the web at:
